

```
public class MostraHash {  
    public static void main(String args[]) {  
        String s1, s2, s3, s4;  
        s1 = "aa";  
        s2 = "ab";  
        s3 = "ac";  
        s4 = "ad";  
        System.out.println("HashCode : " + s1.hashCode());  
        System.out.println("HashCode : " + s2.hashCode());  
        System.out.println("HashCode : " + s3.hashCode());  
        System.out.println("HashCode : " + s4.hashCode());  
    }  
}
```
